Thank you for your interest in Hamilton Grange National Memorial.

Inside of Saint Nicholas Park, in the Hamilton Heights section of Manhattan, you will find the Federalist-style home of one of the Founders of the United States, Alexander Hamilton. Called "The Grange," this early 19<sup>th</sup> century home has survived to tell the story of a man, who was born in very humble circumstances on a Caribbean island, called Nevis, located in the British West Indies and rose to become one of the most influential members of the Founding Generation of the United States.

Desiring to improve upon his beginnings, but having no real resources but his character and intellect, Alexander Hamilton was sponsored by benefactors in the West Indies who recognized his potential. They sent him for a formal education in what was then the Thirteen Colonies, where he attended King's College (now Columbia University). He became involved in revolutionary politics in the 1770s, even as a young student sparring with older and more established figures with writings in New York newspapers opposing and refuting Loyalist supporters. He then served first in the militia and later in the Continental Army. He penned (along with James Madison and John Jay) The Federalist Papers, a series of writings that helped to define, interpret and ratify the U.S. Constitution. Hamilton would serve as the first Treasury Secretary of the United States (1789-1795) under the first president, George Washington. There Hamilton had a strong influence on the design and function of the new Executive Branch of government.
